NOW OFFERING HIGH VOLTAGE ELECTRICAL SAFETY TRAINING!

High Voltage Electrical Safety Training Covering OSHA 1910.269

This class is for qualified employees and focuses on or above 600V to 69 kV industrial high voltage distribution systems.

- Boundaries
- Care and Use of Live Line Tools
- Electrical Safe Work Condition and LOTO
- Enclosed Spaces
- Energized Electrical Work Permit
- Hazards of Shock, Arc, and Blast
- PPE Selection
- Personal Protective Grounding
- Risk Categories Tables and Equipment Labels
- Safe Work Practices

Our Instructors

Our instructors have years of field experience before becoming trainers. They don't read PowerPoint slides or show long videos. And they have the skill and personality necessary to reach their students.

Watch how your employees respond to instructors with wide-ranging, real-world experience, who understand what your employees face on the job.

We Come To You

Our instructors travel to your facility. We can teach in your conference room, or you can arrange for the class to be held at a hotel or training center close to you.

Additional Classes

- Low Voltage NFPA 70E Electrical Safety
- Hands-On Electrical Safety
- Grounding & Bonding
- National Electrical Code (NEC)
- Practical Application of the NEC
